A NOVEL PATIENT STABILIZATION TECHNOLOGY

i INTERVENTIONAL
systems

*SHAPING THE FUTURE
OF PATIENT STABILIZATION*

TECHNOLOGY

iFIX is a patient stabilization system comprised of both reusable and disposable components.

The disposable iFIX Fleece is attached to a reusable anchor product.

The unique micro anchors of the iFIX Patches and Adapters strongly secure the iFIX Fleece for efficient stabilization.

The comfortable stretchy fleece contours to the patient's anatomy like a second skin and secures the desired position.

Depending on your table's design, you can choose between the iFIX Patch that adheres to the table surface, the iFIX Slot Adapter that slides into the channels, or the iFIX Patch Adapter which connect to the fleece products.

IN JUST 4 SIMPLE STEPS THE PATIENT GETS STABILIZED

1a

1b

1

Estimate the required length of iFIX Fleece and cut.

2a

2b

2

On the opposite side of the table attach the iFIX Fleece to anchor product.

Anchor products:
iFIX Patch, iFIX Patch Adapter,
iFIX Slot Adapter

3a

3b

3

Pull iFIX Fleece tightly, up and over the patient.

Do not restrict patient's breathing.

4a

4b

4

Adhere the iFIX Fleece to the anchor product on the other side of the table and stabilize the patient.

If necessary, adjust iFIX Fleece to increase or decrease stabilization.

BENEFITS

simple
secure
intuitive

SAFE

HYGENIC

disposable components lower risk for cross contamination

EFFICIENT

no cleaning time
cost effective
fast user training

i
fix

head to toe
solution

VERSATILE

MULTI
MODALITY

supports several imaging modalities
(CT, X-Ray, MRI, PET/SPECT, US)

Hip and lower spine stabilization

Hip and upper extremity stabilization

Head stabilization with the iFIX Head Mask

Head stabilization with head band

Lower extremity stabilization

Window for direct access
